

REALIZE

an Italian passion

All works of Realize are engineered and manufactured in Italy, by skilled artisans and Italian technicians, and installed all over the world using only Italian workers.

This is the real MADE IN ITALY.

REALIZE company an Italian passion

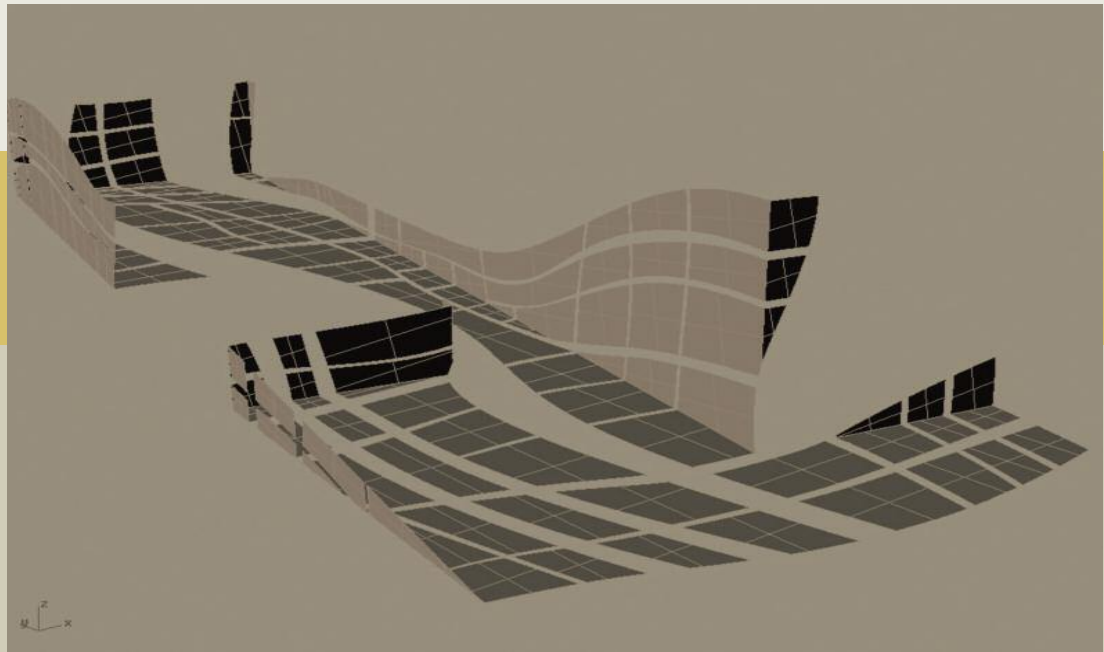

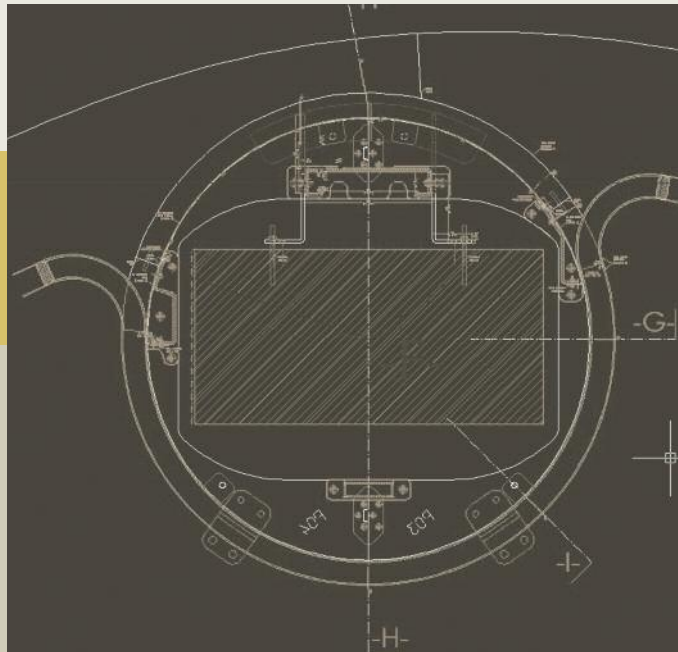

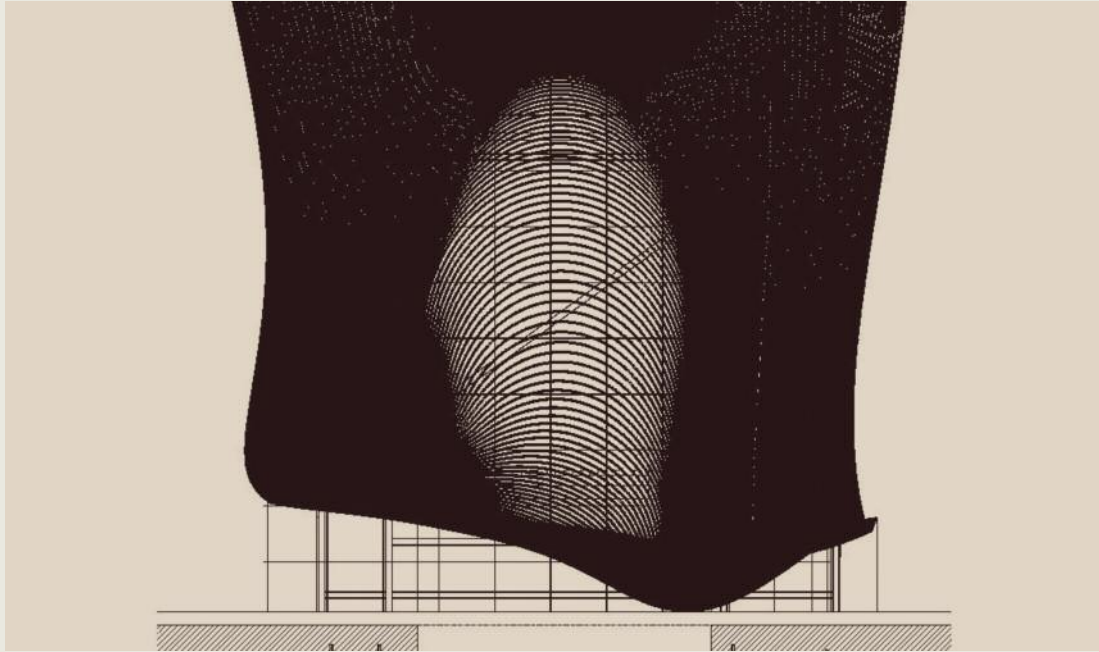

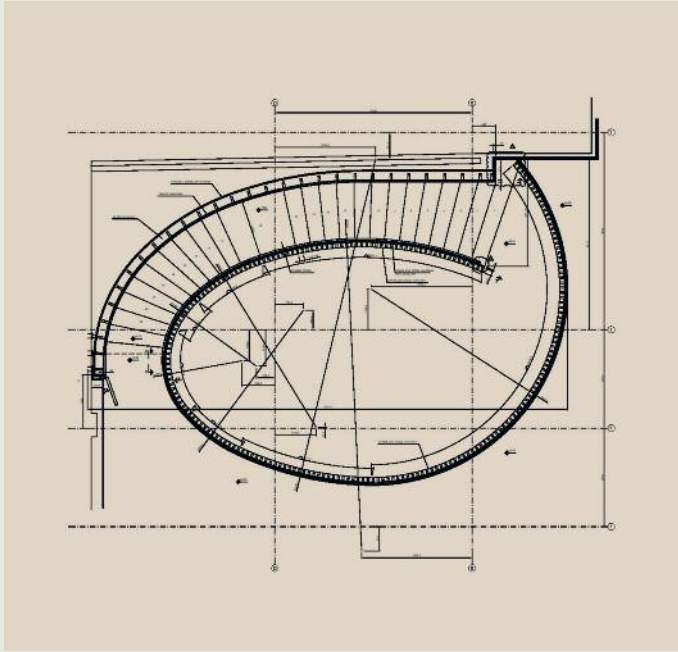

Since long time ago, at our Italian premises close to Milan, we plan and realize special works in metal. We're known for the quality of our polished stainless steel, polished and patinated bronze, brass, copper, pewter and other metals art works for which we can develop particular finishing as per client needs. We work on unique projects of particular planning and construction complexity or on limited editions.

Our staff follow all the planning phases: preliminary costs analysis, on site surveys, static verifications, engineering with 3D cad, construction in our factories, transport and installation all over the world.

Our powerful points are the long experience of our specialized technicians and workmen, the meticulous analysis of each aspect of the project, the care we follow the details and passion for our work.

Roberto Travaglia, Simone Arnaboldi and Laura Sangiorgio
(owner partners of the company)
